

What Should Travel First?

Mapping Indian Snacks & Desserts for Australia and the US

01

What Should Travel First?

Indian food is no longer serving only nostalgia in overseas markets. In Australia and the US, the growing Indian diaspora, wider curiosity for global flavours, and increasing comfort with ready-to-eat formats are creating new opportunities.

The case study starts by framing this shift: from "Indian products for Indians abroad" to a broader portfolio opportunity with mainstream potential.

"Which parts of the portfolio have the strongest right-to-win in Australia and the US, and which new formats could be built for these markets?"

CORE MANDATE

Identify which Indian snacks and desserts hold the strongest market-entry potential in Australia and the US — across current portfolio and new launch possibilities.

APPROACH

Multi-signal analysis across consumer search interest, category growth, snack and dessert preferences, format behaviour, and relative demand patterns.

02

Reading Demand Across Australia & the US

The analysis used a market-signal approach across both geographies, helping separate high-interest opportunities from niche, seasonal, or lower-readiness spaces.

SIGNAL DIMENSIONS

Search Interest

Category Growth

Format Behaviour

Snack Preferences

Dessert Demand

Relative Patterns

KEY DEMAND SIGNALS

- **Diaspora pull vs. mainstream curiosity** — different products carry different adoption pathways across the two markets.
- **Convenience and format** — ready-to-eat, frozen, and snacking formats show strongest signs of broader adoption.
- **Festive vs. everyday** — some products remain seasonal while others show signs of habitual consumption.
- **Familiar foods, new behaviours** — the same Indian product can behave very differently once it enters international markets.

03

Build for Relevance, Readiness & Repeatability

THE KEY SHIFT

Stop evaluating launch potential through popularity alone. Ask: Is it relevant, ready, and repeatable?

The core strategic shift was to avoid looking at market entry only through demand signals. The stronger lens combined relevance to the audience, readiness for the market, and repeatability beyond one-off curiosity.

"This allowed the team to think beyond demand signals and consider habit formation, format suitability, and the role each product could play in the portfolio."

THE PORTFOLIO LENS

CURRENT PORTFOLIO

Existing products — what can be activated from the current range with market-fit potential?

MARKET SIGNALS

Demand mapping — which categories show durable pull vs. seasonal or niche interest?

NEW PROPOSITIONS

Future formats — what could be built specifically for these international markets?

04

Unlocking the Launch Pipeline

The work helped shape a practical launch pipeline across current and future opportunities — giving a clearer view of where to prioritize, validate, and build presence.

Portfolio Fit Assessment

Evaluated which existing products hold market-entry potential vs. which need format or positioning changes.

Market-Specific Signals

Separated Australia and US demand patterns to inform geo-specific entry strategies rather than one-size-fits-all.

Launch Readiness

Identified spaces requiring further validation vs. those ready for immediate activation.

Growth Potential Mapping

Mapped categories with habit-formation potential beyond one-off curiosity purchases.

UNITED STATES

Growing diaspora base and mainstream snacking culture create dual-track entry points for Indian formats.

AUSTRALIA

Strong multicultural appetite and convenience-led grocery behaviour offer faster activation pathways.

05

From Market Scan to FY 26–27 MVPs

The study moved from insight to action. For Australia, two opportunity areas from the work were taken forward as part of the FY 26–27 MVP launch pipeline.

Market Entry

Informed market-entry thinking and geo-specific portfolio planning for both regions.

MVP Pipeline

Two Australia opportunity areas advanced to FY 26–27 MVP launch pipeline.

Portfolio Strategy

Clearer view of which spaces to prioritize, validate further, or build new presence.

MOST APPRECIATED INSIGHT

Familiar Indian foods don't behave the same once they move into international markets

This insight reshaped how the brand evaluated its portfolio — moving from "what's popular in India" to "what's relevant, ready, and repeatable in each target market."
